

## Allergy Information

It is the school's responsibility to be aware of, and alert us, when someone in their population might be allergic to the fruits and/or vegetables that are scheduled to be delivered. To check the products scheduled to be delivered to your school, go to your [school login](#).

It is each school district's responsibility to keep abreast of any new and current allergy issues. Please consult with your school district in regards to policies, procedures, and the most up-to-date allergy information.

There are many variables in regards to allergies these days, and there are a variety of questions that should be answered before determining that an allergy would have cross-reactivity to related - and unrelated - foods. This is done by way of an "allergy profile" through your student's family physician. Other crucial information that each school should have on hand in regards to students' "allergy profile" is:

- Is it airborne?
- Is it by ingestion only?
- Is it a sensory allergy (through touch)?

If you would like further guidance in this area, please contact your school district.
